

How can you reduce your tech carbon footprint?

.....

Compact fluorescent bulbs can last up to 15 times longer and use up to 80% less energy than regular lightbulbs.

.....

.....

Rechargeable batteries can shave almost 1,000 pounds off of your carbon footprint by the time the batteries die for good.

.....

.....

Many appliances use energy simply by being plugged in. Buy a power strip and plug several devices into one outlet. Power strips have on/off switches, and you won't waste any electricity once the power is turned off.

.....

.....

Unplug your phone charger when you're not using it.

.....

.....

Laptops can use up to 80% less energy than a desktop

.....

.....

Use ceiling fans instead of air conditioning. If you live in a climate where you rely heavily on your A/C this could save you up to a ton in CO2 emissions.

.....

.....

Switch to more energy efficient technologies with the Energy Star qualifications.
